Contents of Volume 69

Nos. 1/2

D.W. Hoffman, J.S. Hochreiter, D.R. Landry, M.R. Brimijoin, M.D. Treadwell, P.D. Gardner and R.A. Altschuler *(USA)*
Localization of preproenkephalin mRNA-expressing cells in rat auditory brainstem with in situ hybridization 1

D.Z. Pitovski, M.J. Drescher and D.G. Drescher *(USA)*
High affinity aldosterone binding sites (Type I receptors) in the mammalian inner ear 10

L. Chen, R.J. Salvi and E. Hashino *(USA)*
Recovery of CAP threshold and amplitude in chickens following kanamycin ototoxicity 15

J.C. Saunders, A.J. Torsiglieri and R.M. DeDio *(USA)*
The growth of hearing loss in neonatal chicks exposed to intense pure tones 25

C.A. Miller, P.J. Abbas and B.K. Robinson *(USA)*
Characterization of wave I of the electrically evoked auditory brainstem response in the guinea pig 35

M. Chatterjee and R.L. Smith *(USA)*
Physiological overshoot and the compound action potential 45

D.A. Ronken, W.R. Bosch and C.E. Molnar *(USA)*
Effects of spike discharge history on discharge probability and latency in frog basilar papilla units 55

W. Yao and D.A. Godfrey *(USA)*
Choline acetyltransferase in cochlear root neurons 76

L. Gray *(USA)*
Simultaneous masking in newborn chickens 83

C.J. Dechesne, L. Winsky, B. Moniot and J. Raymond *(France, USA)*
Localization of calretinin mRNA in rat and guinea pig inner ear by in situ hybridization using radioactive and non-radioactive probes 91

C.L. Faingold, C.A.B. Anderson and M.E. Randall *(USA)*
Stimulation or blockade of the dorsal nucleus of the lateral lemniscus alters binaural and tonic inhibition in contralateral inferior colliculus neurons 98

P. Wangemann, N. Shiga and D.C. Marcus *(USA)*
The Na^+/H^+ exchanger in transitional cells of the inner ear 107

M.R. Kok, G.A. Van Zanten and M.P. Brocaar *(The Netherlands)*
Aspects of spontaneous otoacoustic emissions in healthy newborns 115

D.C. Marcus, S. Takeuchi and P. Wangemann *(USA)*
Two types of chloride channel in the basolateral membrane of vestibular dark cells 124

R. Hauser, R. Probst and F.P. Harris *(FRG, Switzerland)*
Effects of atmospheric pressure variation on spontaneous, transiently evoked, and distortion product otoacoustic emissions in normal human ears 133

H.H. Lim, O.H. Jenkins, M.W. Myers, J.M. Miller and R.A. Altschuler *(USA)*
Detection of HSP 72 synthesis after acoustic overstimulation in rat cochlea 146

J. Li and E.D. Young *(USA)*
Discharge-rate dependence of refractory behavior of cat auditory-nerve fibers 151

C.M. Hackney, R. Fettiplace and D.N. Furness *(UK, USA)*
The functional morphology of stereociliary bundles on turtle cochlear hair cells 163

H. Gobsch and G. Tietze *(FRG)*
Interrelation of spontaneous and evoked otoacoustic emissions 176

L. Luo, H. Koutnouyan, A. Baird and A.F. Ryan *(USA)*
Acidic and basic FGF mRNA expression in the adult and developing rat cochlea 182

J.R. Crist, M. Fallon and R.P. Bobbin *(USA)*
Volume regulation in cochlear outer hair cells 194

A. Didier, J.M. Miller and A.L. Nuttall *(France, USA)*
The vascular component of sodium salicylate ototoxicity in the guinea pig 199

K. Ogawa and J. Schacht *(USA)*
Receptor-mediated release of inositol phosphates in the cochlear and vestibular sensory epithelia of the rat 207

H. Kuriyama, R.L. Albin and R.A. Altschuler *(USA)*
Expression of NMDA-Receptor mRNA in the rat cochlea 215

E.S. Goldey, L.S. Kehn and K.M. Crofton *(USA)*
The sensitivity to 3,3′-iminodipropionitrile differs for high- and midfrequency hearing loss in the developing rat 221

S. Freeman, M. Geal-Dor, Y. Shimoni and H. Sohmer *(Israel)*
Thyroid hormone induces earlier onset of auditory function in neonatal rats 229

M. Geal-Dor, S. Freeman, G. Li and H. Sohmer *(Israel)*
Development of hearing in neonatal rats: Air and bone conducted ABR thresholds 236

B.G. Shivapuja, Z.-P. Gu, S.S. Saunders and W.S. Quirk *(USA, People's Republic of China)*
Acute effects of cocaine on cochlear function 243
